

32 Tumblebrook Drive Bolton, CT

As you walk down the walkway made of brick pavers from the driveway to the front entry at the farmer's porch, 2 lamp posts will light your way, along with an abundance of torch lights and spots. The paved drive has a huge area in which to turn around or park more cars.

This stunning colonial has 4 bedrooms, 2 ½ baths and features: a sunken front to rear living room with a fireplace, a formal dining room with crown molding, chair rail and wainscoting, and a huge kitchen with a breakfast nook bump out and island. Granite counters, maple cabinets and recessed lighting complete the kitchen, which is also open to the living room with the fireplace in view. Off the very spacious living room (34x14 and 9'ceiling) you can enter the 1st floor "wing" library/music room through the French doors where you will be greeted with a beautiful circle top window and vaulted ceiling. This window matches the gorgeous circle top window in the 2nd floor master bedroom suite (34x14), which is also vaulted, with a huge walkin closet, master bath with a corner whirlpool tub, shower and vanity with double sinks. The vanity top (as all the vanity tops) is granite with a white porcelain undermount sink. The flooring in the master bath is marble in a stunning pale rose. The 2 other bedrooms are of good size and bright with 2 windows in each. The media room (bonus room) off the 2nd floor hall, which can also be a 4th bedroom, is huge - dormered out the rear and features recessed lights, 9' tray ceiling and built-in book shelving. This home also features a farmer's porch and a rear deck, all built with trex.

The flooring consists of all hardwood on the 1st floor, including foyer, kitchen and hall, and hardwood in the 2nd floor hall and of course hardwood (oak) stairs. The powder room boasts granite floors and tile in the mudroom. There is also tile flooring in the main bath and laundry area. All the bedrooms are carpeted including the media room.

The walkout basement is rough plumbed for an additional half bath and has a slider and 4 windows. All the "mechanicals" in the basement are located in the "wing", leaving the main part of the basement of over 1000SF, bright and open. Walk out and enjoy your private rear yard from here or from the stairs leading from the deck.

This home, with generous lighting, beautiful flooring, vaulted ceilings, sunken living room, circle top windows, granite, marble and more, has something unique to offer in each room.
